

# La Marzocco Technical Bulletin #109

## New T Fitting for Silicone Tube

We would like to inform you about the new "T" fittings currently being used in the production of the following machines:

|            |                           |
|------------|---------------------------|
| Linea PB   | starting from SN PB002494 |
| Linea Mini | starting from SN LM000346 |
| Linea-FB70 | starting from SN L046143  |
| GB5-FB80   | starting from SN GB013919 |
| Strada     | starting from SN ST002166 |

We have upgraded to a new high temperature plastic material (white) which replaces the previous Nylon (blue) fitting with the same dimensions. This new product has a superior lifespan and decreased replacement operations which supports the increased cost for the material.

The new spare part code is A.7.001.01, and the new T fittings are already available for order through the Parts Department.

Please do not hesitate to contact our solutions team with any questions you have about this update.
