

La Marzocco Technical Bulletin #146

Modified Flow Meter Sensor

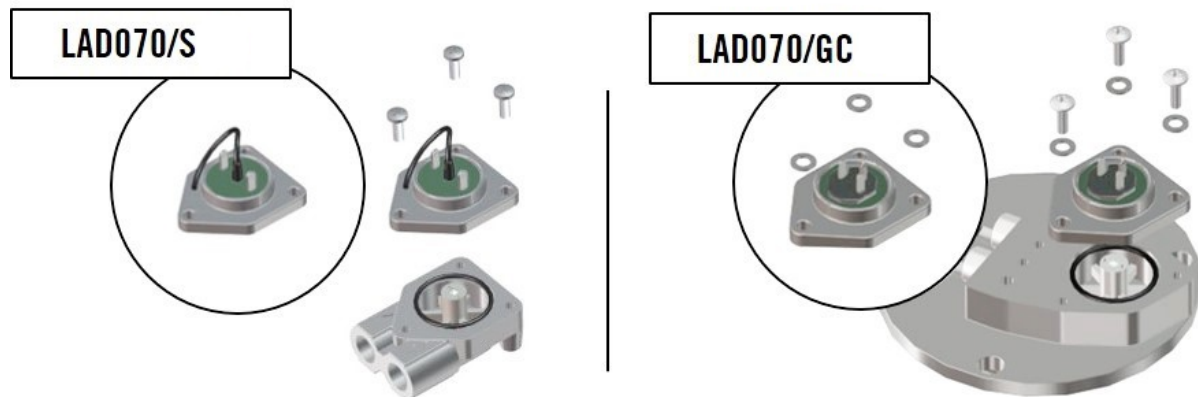

May 25, 2018

The flow meter field sensors have been modified. The new parts are slightly thinner than the previous versions and are functionally the same. The part numbers will remain the same.

Due to the new flow meter field sensor being thinner, the LAD070/GC will come with three washers. This will allow installation of the LAD070/GC using the same screws. This does not apply to the LAD070/S as the screw holes are long enough to accommodate the screws with the thinner flow meter field sensor.

screw holes are long enough to accommodate the screws with the thinner flow meter field sensor.
