## Updated Push-In Fitting A.2.101

January 24, 2019

The push-in fitting connected to the hot water solenoid on the GS3, Strada and Leva, has been re-designed. The new fitting is made of a combination of stainless steel AISI 316L and a high-temperature-resistant technopolymer.

The new fitting is now in production on machines starting from the following serial numbers:

GS3: GS010794

Strada: ST005183

Leva: LV000336

The new fitting is fully interchangeable with the previous version. Note: if you order an A.2.101 as a spare part, you may get the previous steel version as we work through our stock.
