### **LA MARZOCCO USA FILTER BASKET UPDATE**

Last year La Marzocco revolutionized the espresso world by creating a best in class filter basket we have named Strada Filter Basket. We are confident that these filter baskets will improve the clarity and consistency of your espresso. There are two distinct differences in the creation of Strada Filter Baskets: a new manufacturing process, along with a first of its kind QC process.

La Marzocco has now decided to expand its efforts in basket production to other model lines, with our "Advanced Precision Filter Basket". These new filter baskets will now come standard on Linea, GB/5, FB/80 and GS/3 machines. Advanced Precision Filter Baskets share the same manufacturing process as Strada Filter Baskets, but to keep machine prices affordable these baskets are not individually scanned. These new filter baskets will soon be available as parts, using the part number identified in each set of filter baskets photos.

Below you will find five pages of basket identification photos, which allow you to identify your basket and be confident in your basket's consistency.

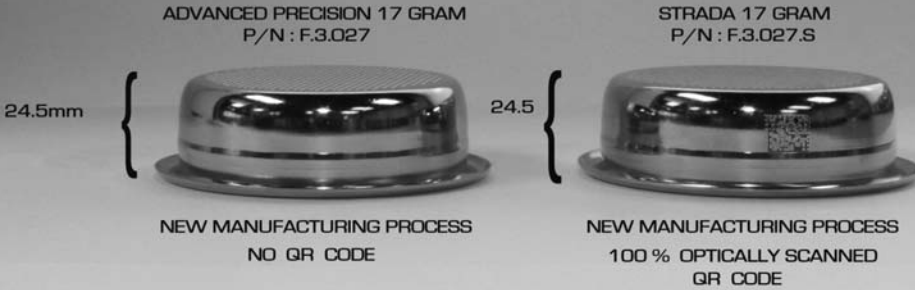

We hope this helps you in your technical needs, and as always if you have any questions please call your La Marzocco reseller or us directly at 206-706-9104 x 101 with any questions.

Thanks,  
Scott Guglielmino
