

HANDMADE IN FLORENCE

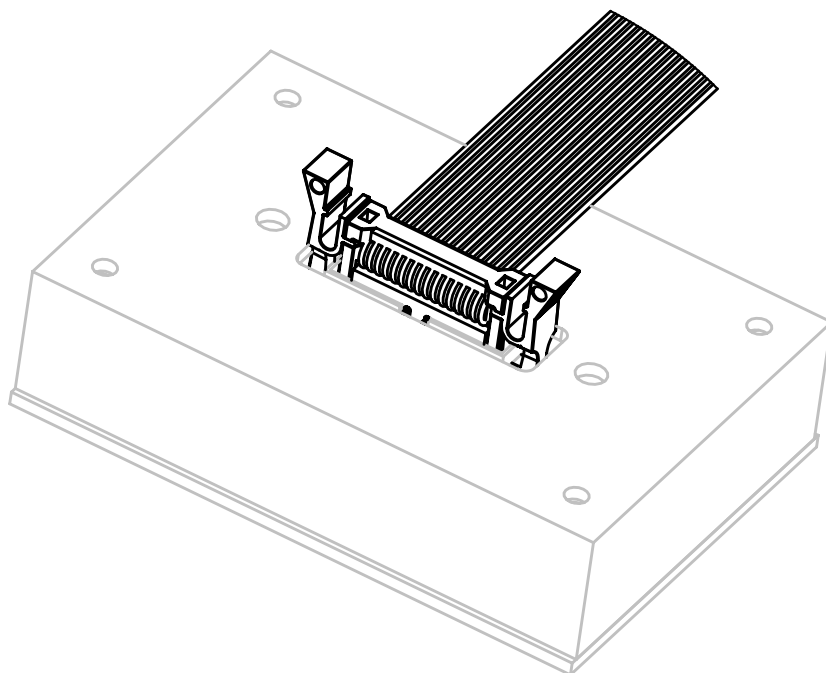

TECHNICAL BULLETIN #32

TECHNICAL REFERENCE: 062907/32

June 29, 2007

MODEL/S AFFECTED: GB/5 and FB/80 models since the machine serial number 0500 - ALL
PART/S DESCRIPTION: new 16 pin ribbon cable wing connector and push button bottom box

La Marzocco replaced the 16 pin ribbon cable connector with a new updated model. The new connector is equipped with two wing clips on the sides to ensure the connection between the cable and the female connector. Consequently the back plastic box cover (EE model-E.1.007) for the manual brew switch has been modified with a larger slot to accommodate the new connector. The modification does not affect the rest of the GB/5 & FB/80 AV model key pad boxes.

The following is a kit description:

HANDMADE IN FLORENCE
